

-40°/-86°

#### ULTRA LOW TEMPERATURE I HIGHLY RELIABLE ULT FREEZER WITH NATURAL REFRIGERANT AND LOW POWER CONSUMPTION

The freezer comes with the extremely powerful independent **TRUE DUAL™** technology that keeps the samples protected at -70°C if an unexpected failure occurred keeping you worry-free and the samples secured and safely guarded.

NATURAL

### RELIABLE FREEZING

This model features a swift pull-down time of about 3 hours<sup>1</sup>, showcasing a strong cooling system with robust insulation from a mix of polyurethane and vacuum-insulated panels.

Even with frequent door openings, it quickly reestablishes a uniform temperature, maintaining a reliable environment unaffected by external temperatures, thanks to its excellent temperature recovery capabilities.

<sup>1</sup>See below graph under "Improved recovery time" Ambient temperature 32°C Freezer with no-load.

#### ENVIRONMENTALLY FRIENDLY

Our units are completely free of HFCs, HCFCs, CFCs, and PFCs. Additionally, the ODP value is zero, ensuring effective sample protection while fully safeguarding the environment.

These eco-friendly refrigerants also reduce energy consumption, enhancing the cooling system's cost-effectiveness and maintaining high performance through strong thermodynamic properties.

# ULTIMATE SAMPLE PROTECTION

This model incorporates advanced technologies and the very best components for exceptional performance.

Our TRUE DUAL<sup>™</sup> technology prevents sample loss by keeping the freezer operational in the unlikely event of one compressor failing, maintaining -70°C. This ensures your research or samples are protected around the clock, avoiding the risks associated with inferior laboratory equipment.

## MULTI-VOLTAGE

Our multi-voltage freezers operate between 100 to 240 volts, seamlessly integrating into global settings without additional adapters or transformers.

This adaptability also ensures resilience against power fluctuations, providing safe and stable storage for sensitive materials.

# **► EFFICIENT TECHNOLOGY**

This device is supplied with inverter technology, enabling variable compressor speed, lower energy consumption and lower noise levels with the additional effects of being very robust against fluctuations on the power grid and differences in supply voltage, no need for voltage stabilizers and/or voltage regulators.

P510 MV

ULUF

The first-class V700 controller is equipped with all necessary alarms and features on top of everything, we developed ECO mode to reduce energy consumption while maintaining optimum uniformity for the stored materials.

We designed the model with easily accessible compartments including four removable inner doors that are individually insulated with magnetic catches. This smart function also guarantees easy defrosting and effortless maintenance of the unit.

Our new vacuum valve solution features an automatic pressure equalization port. With fast, reliable pressure equalization, your valuable samples remain protected, while allowing for effortless opening and operation whenever needed.

The modernized shelves in the new Integraline are perforated and easily adjustable, offering the best flexibility for your storage needs. Extra durable shelves with up to 50 kg.

TRUE DUAL<sup>™</sup> TECHNOLOGY

#### ▲ IMPROVED RECOVERY TIMES

Pull-down times measures how quickly a freezer can reach the correct temperature, the faster the better. Hold over indicates the time the freezer can maintain a safe internal temperature.

IEC 61010 / EN IEC 61010 / CSA C22.2 no 61010

#### ARCTIKO TRUE DUAL<sup>™</sup> System

ARCTIKO's true dual cooling system provides a reliable backup, maintaining consistently low internal temperatures. This advanced system ensures additional safety, high performance, and fast temperature recovery, with the capability of maintaining a stable -70°C, offering unmatched protection for your valuable samples.
