

true cooling specialists

HIGHLY RELIABLE CRYOGENIC FREEZER WITH INDEPENDENT TRUE DUAL™ TECHNOLOGY PROVIDES THE BEST SECURITY FOR YOUR SAMPLES. The cryogenic freezer offers a wide variety of research and long-term storage application for ultra low temperature scientific experiments, preservation of cells, DNA, bone material & bacteria.

ENERGY EFFICIENT

ARCTIKO's CRYO 230 freezer only uses 31 kWh/24 h which is extremely low compared with competitors.

The independent TRUE DUAL[™] technology ensures extremely low cost of ownership and noticeable impact on the runnings costs. The CRYO Series is a superior alternative to LN₂ based products, e.g. cryotanks. With no LN₂ needed, it operates solely on a power supply which lowers the operating costs.

SUPERIOR PERFORMANCE

The dual cooling system is designed to keep the unit at -150°C, and with only one cooling system active the unit is still able to achieve -130°C – with an outstanding uniformity of +/-3°C.

The TRUE DUAL[™] technology makes sure that you are provided with the best and most secure and reliable cryogenic freezers with excellent temperature stability and superior performance.

MOST SECURE CHOICE

ARCTIKO's CRYO freezer eliminates the cost of LN₂ storage maintenance and avoids hazardous operation conditions.

ARCTIKO's CRYO freezers are specially developed to avoid cross contamination and to provide a more environmentally friendly economic alternative to the LN₂ cryotanks. Choosing this CRYO you will have one of the most reliable freezers available in the market.

Temperature chart recorder for recording of temperature (optinal).

User-friendly controller with access to all the necessary functions.

Key lock is standard feature in our CRYO 230. Placed on handle for optimal security of your samples.
